

Will ETHERMEDIA Apps run on the new iPad from Apple?

Wednesday, 27 January 2010

Absolutely. As per the presentation by Steve Jobs on January 27th, the iPad will run all the iPhone Apps natively. While there will be a new iPad SDK to help develop Apps that take advantage of additional capabilities of iPad, any ETHERMEDIA apps you bought should run seamlessly on the iPad. Also, we will be updating ETHERMEDIA to automatically sense iPad and provide more advanced features that the iPad provides.
